DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the first sheet feed device that feeds each of the tab sheets of the predetermined tab sheet bundle to an image transfer position via a first conveying path with the tab sheet being inverted must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will

be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Selective Tab Sheet Inverting Device.

Claim Rejections - 35 USC § 112

4. Claims 1-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

a. Regarding claims 1-10, the claims first recite “a predetermined tab sheet bundle”. The claims go on to recite “a first sheet feed device that feeds each of the tab sheets of the predetermined tab sheet bundle” to an image transfer position via “a first conveying path with the tab sheet being inverted” and “a second sheet feed device that feeds each of the tab sheets of the predetermined tab sheet bundle” to the image transfer position via “a second conveying path without the tab sheet being inverted”. Finally, the claims recite a controller “to automatically select said first sheet feed device or said second sheet feed device. Thus, the claims recite one tab sheet bundle and the tab sheets are either fed to an image transfer position via a first feed device with a first conveying path that inverts the sheet or via a second feed device with a second conveying path that inverts the sheet.

Art Unit: 3651

The specification, however, discloses a first tab sheet bundle with inverted tab sheets and a second tab sheet bundle without inverted tab sheets. There is no support in the specification for a conveying path that inverts sheets.

b. Regarding claims 9-12, the claims recite “a controller responsive to a tab sheet bundle being set in the normal order” or “a controller responsive to a tab sheet bundle being set in reverse order”. However, the specification does not disclose a controller that is responsive to the sheet bundle. Rather, the specification discloses a controller responsive to manual input regarding the sheet bundle.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Nimura (JP 2000338729 A).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
